How is the CleanAir System different from other air purifiers?

Only the CleanAir System is guaranteed to penetrate inside and behind your walls and carpets, where mold, bacteria and pests reside. We leave your home – guaranteed toxigenic mold free.

Safely Wipe Out

- ✓ **Toxigenic or Black Mold:** such as Stachybotrys Chartarum
- ✓ **Viruses and Bacteria:** Staph (MRSA), streptococcus, salmonella, e.coli, listeria, anthrax
- ✓ **Pests:** dust mites, cockroaches, bedbugs, lice and mice
- ✓ **Unpleasant Odors:** smoke, mildew, pets

7 am Home is cleared of people, pets, plants and our technology begins to run.

4 pm Sanitizing and Purifying the Property.

7 pm All mold, bacteria, viruses, and odors in and behind the walls are dead.

10 pm The system has been off for 3 hours and it is safe for the homeowner and technician to return to the sanitized home.

Clean Air Systems' technology was invented by scientists who have worked for NASA and the US military. By combining patent pending technology with one of the strongest polymers ever invented, the CleanAir System generates the highest concentration of natural ozone ever produced—allowing us to get inside and behind your walls.

Our system is safe for the environment and your furnishings. It leaves no residue and is 100% chemical & pesticide free.

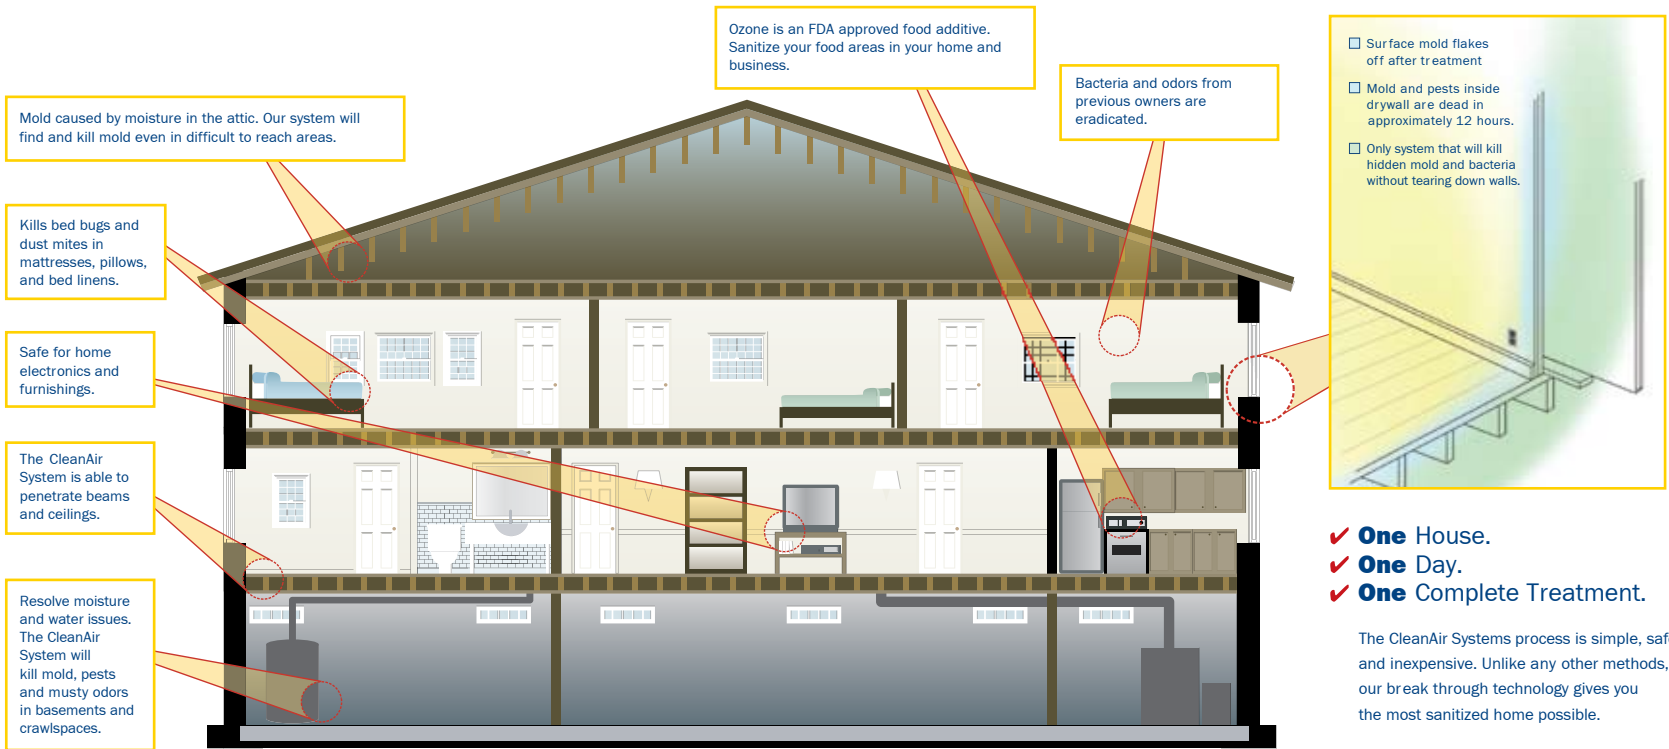

One Home One Treatment

Time and kill rates are based on a 23,000 cubic foot house. Times may vary depending on structure size, layout and level of infestation.

"A Technological Breakthrough for Indoor Air Quality"

"We deliver the highest quality of indoor air by eradicating harmful bacteria, viruses, and other indoor air contaminants like mold"

Mold caused by moisture in the attic. Our system will find and kill mold even in difficult to reach areas.

Kills bed bugs and dust mites in mattresses, pillows, and bed linens.

Safe for home electronics and furnishings.

The CleanAir System is able to penetrate beams and ceilings.

Resolve moisture and water issues. The CleanAir System will kill mold, pests and musty odors in basements and crawlspaces.

Ozone is an FDA approved food additive. Sanitize your food areas in your home and business.

Bacteria and odors from previous owners are eradicated.

- Surface mold flakes off after treatment
- Mold and pests inside drywall are dead in approximately 12 hours.
- Only system that will kill hidden mold and bacteria without tearing down walls.

- ✓ **One** House.
- ✓ **One** Day.
- ✓ **One** Complete Treatment.

The CleanAir Systems process is simple, safe and inexpensive. Unlike any other methods, our break through technology gives you the most sanitized home possible.
